AGREEMENT CLAUSE:

As a qualified MID customer, I certify that I will purchase and install the indicated energy-saving products for use in my business facility and not for resale. I agree to verification by MID of both the sales transactions and product installation and I certify that the information on this application is true and correct. I understand that rebate payments are based on related energy benefits over the life of this product and I agree to maintain service with MID for 3 years from the date of this application.

Customer Signature: _____ **Date:** _____

ELIGIBILITY:

The Energy Retrofit and New Construction Program rebates are available to any MID industrial, commercial, or agricultural customer. Rebates will only be issued for projects that show an overall wattage reduction as determined by a District Energy Services representative. The maximum rebate is \$150,000 per year, per customer and will not exceed 60% of the project's cost (equipment plus labor). Qualifying accounts for the Retrofit Program must be active and show previous energy use.

HOW TO APPLY:

1. Submit this application with project energy savings calculations and an estimate of project costs to MID (P.O. Box 2288, Merced, CA 95344-0288).
2. MID will contact you to schedule a pre-inspection visit. MID will notify you of your approval for rebate.
3. Notify MID of the project completion and schedule an inspection visit.
4. At the time of inspection we will require an original or legible copy of your PAID IN FULL itemized receipt.
5. Project MUST be completed within 90 days of submitting this application for rebate.

The Merced Irrigation District reserves the right to request specific manufacturer specifications and/or data. MID also reserves the right to periodically review and make changes to the program standards and requirements without prior notice. Payment by MID of any rebate does not imply endorsement or approval of any individual equipment manufacturer or supplier. Equipment performance and efficiency shall be the responsibility of the rebate recipient.

1.) Provide a brief description of the project (or an attachment provided by the vendor):

2.) Equipment to be installed:

3.) Total Project Cost: \$ _____

4.) Projected annual Kilowatt hour savings created by this project: _____ kWh _____

2009-2010 MID COMMERCIAL CONSERVATION INCENTIVE PROGRAM

Merced Irrigation District is interested in promoting conservation for electric usage. In order to encourage the investment required to reduce electric demand and kWh consumption, MID proposes the following:

- Customer to evaluate the usage of all equipment that is in operation for methods to reduce energy.
- Customer to identify specific conservation that will produce long term results that are not fuel switching or removal of equipment without replacement.
- Customer's engineer to write up the proposal with computations on the net kWh savings and demand reduction. Computation support may be provided by MID upon request.
- Customer will then send this application form, and a proposal with cost estimates of the equipment to accomplish the conservation to MID for review and approval.

MID will consider payment for conservation based on total kWh saved over one year at a customized rate to be determined by the MID Public Benefit's Program or 60% of the installation cost, whichever is lowest, up to \$150,000 per year. MID will budget an amount each year for the projects and will approve projects up to the limit of the budget.

This program is subject to change as determined by the Board of Directors of the Merced Irrigation District.
